

SUSTAINABILITY ENGAGEMENT & EDUCATION

Preliminary Readiness Assessment (PRA)

PRA is a service by EcoSolver that benefits organizations in evaluating their readiness and maturity level in sustainability. This assessment takes a holistic approach to probe various aspects of the sustainability transformation journey, identifies gaps, and recommends focus areas and concrete actions to elevate the organization's sustainability efforts. PRA is designed to work for organizations of all types and sizes, whether they are in the beginning of their sustainability journey or they are advanced sustainability performers with established strategy, implementation, and reporting practices.

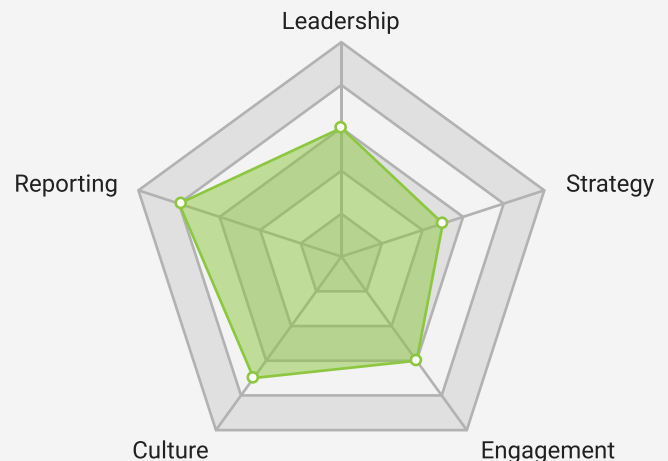

PRA creates value for organization in the following key aspects:

- Involves a broad spectrum of employees to gauge their understanding of sustainability, assess its importance to them, and educate them on sustainability concepts and requirements
- Helps organizations get a sense of where they are on sustainability transformation journey and where they need to focus going forward
- Provides a fact-based ground for the next actions and for effective allocation of efforts and resources

What You Will Receive

Based on the assessment, we will provide you with:

- A visual illustration of the organization's position (regarding the 5 aspects)
- Detailed analysis of the gaps in sustainability effectiveness
- Proposed viable focus areas based on the analysis and the organization's capacity
- High-level action plan to take your sustainability transformation journey to the next level

How to Participate

Let's plan to run PRA for your organization. EcoSolver will set up the online survey platform for participation of your team members. We will provide guidance and support to enable employees at any level and any function to share their thoughts on the organization's sustainability activities.
